Venkateshwaran M

AI R&D Engineer | Generative AI | AI Agents | LLMs | RAG |
LangChain | Python | Machine Learning
Madurai, Tamil Nadu, India

Summary

Reduced reporting time by 30%, improved model accuracy by 20%, and delivered multiple end-to-end analytics and machine learning solutions across real-world projects and internships.

I work at the intersection of data, engineering, and business outcomes — building clean pipelines, training ML models, and translating raw data into clear insights teams can actually use. My experience spans exploratory analysis, predictive modeling, dashboards, and workflow automation using Python, SQL, Power BI, and Scikit-learn.

I've built production-style projects including ML classification systems, NLP chatbots, ETL data warehouses, and automated reporting workflows. I focus on structured problem solving, clean code, and documentation so solutions are reliable and scalable — not just experiments.
